in hilalelayoubi 🌐 github.com/NotHilal

ESILV graduate engineer specializing in software development, cloud computing, and cybersecurity, with experience in R&D and several freelance personal projects.

Education

ESILV - Pôle Universitaire Léonard de Vinci

State-certified Engineering Degree in Software Development, specializing in Cloud Computing and Cybersecurity

Graduated with honors from the examination board

Semester abroad in Dublin (Dorset College, January - May 2024)

La Défense, France

Sep 2020 - Aug 2026

Experience

Dassault Systèmes

Full-Stack and DevOps R&D Assignment: Kubernetes / KEDA / Cassandra / Prometheus /

React

- Implemented event-driven autoscaling for a distributed Cassandra database in a Kubernetes cloud environment.
- Used KEDA, Helm, and other DevOps technologies.
- Developed a real-time React monitoring dashboard displaying scaling metrics.

Vélizy, France

Feb 2026 – Jul 2026

Captag

C# and Java Mobile Developer Internship C# / Java / Android / .NET 8.0

- Migrated and modernized legacy projects to .NET 8.0, fixed critical memory leaks, and updated obsolete dependencies.
- Integrated artificial intelligence APIs for image generation (Replicate) into the Totem Photo photobooth application.
- Developed Android mobile applications in Java with a point-based gamification system and QR Code/RFID support.
- Provided technical support during live events (Orange Leaders Meeting with 1,700 participants and Louis Vuitton Men's Fashion Show).

Paris, France

May 2025 – Aug 2025

Projects

Personal Portfolio — React, Tailwind CSS, Framer-Motion

🌐 nothilal-portfolio.vercel.app

- Personal portfolio website showcasing my projects, skills, and background, with a modern design and smooth animations.

Chatbot Butine Groupe — AI Services, Hybrid RAG, Elasticsearch, Automation

🌐 butinegroupe.fr

- Worked as a service provider designing and deploying custom artificial intelligence solutions.
- Set up internal AI servers and computing clusters to ensure data security and confidentiality.
- Designed custom chatbots and AI agents for companies, consulting firms, and local authorities.
- Developed a multi-index hybrid RAG system with Elasticsearch and an automated data collection, indexing, and update pipeline.

PokeLegends — Java

🌐 NotHilal/MyPokeLegends

- Pokémon-inspired combat adventure game with pixel art (in development).

Fit-Buddy — TypeScript, React Native, Supabase, AI

🌐 [Private project upon request](#)

- University project: AI-powered fitness application with personalized nutrition and coaching.

Management

Esports Team Manager (Semi-Professional Level)

2021 - 2025

- Managed three competitive teams per year, overseeing training, scheduling, and tournament participation.
- Organized weekly coaching sessions and coordinated with coaches to optimize player development.
- Provided strategic and mental support to players, fostering resilience and team cohesion.
- Identified and registered teams for high-level tournaments, supporting their competitive growth.

Skills

Programming Languages: C, C++, C#, Java, Python, Bash, Kotlin, TypeScript, HTML, CSS, JavaScript, React

Databases: MySQL, NoSQL, MongoDB, CassandraDB, Supabase

Technologies/Frameworks: Git, Linux, Visual Studio, JetBrains, Android Studio, React Native, Unity, Eclipse, VMWare, VirtualBox

Cloud and DevOps: Docker, GitLab CI/CD, Kubernetes, KEDA, Helm, Prometheus, PromQL, JMX

AI & Modern Tools: AI Agents (configuration and deployment), Vibe Coding, Cursor, Prompt Engineering

Programming Paradigms: Object-Oriented Programming, Functional Programming

Languages: French (native), English (C2), Arabic (C1)
